

WAXILIT® 22 - 21 FL and 22 - 30 P lubricants

For woodworking machines

BASIS:

No substances regarded as toxic or carcinogenic according to the Regulations concerning Dangerous Substances are used in the production of **WAXILIT 22-21 FL and 22-30 P**.

PROPERTIES:

WAXILIT 22-21 FL is a **liquid** release agent.

WAXILIT 22-30 P is a **pasty** release agent.

There is no difference in the quality but only in the supply form (liquid/pasty). Both lubricants do not contain silicones.

APPLICATION:

Both lubricants can be applied only with a brush or cloth. Do **NOT** pour into automatic pumps (danger of blockage). Hence **always use only manually**. No spot formation. There have been no reports of trouble during subsequent staining, varnishing or gluing. Likewise highly suitable for treatment of slide rails, hinges, drawers, saw blades, cutters and veneer jointing machines operating with an adhesive paper tape.

Ask for **WAXILIT 22-40 D** for plastics sliding surfaces.
